TISHKEN

SPECIALTY COIL PROCESSING SOLUTIONS

Tishken equipment ranges from simple, economical flattening-edging-straightening units up to rugged, heavy-duty, high speed lines to reduce thickness, square or round edge, cutoff and/or recoil. Build a line to meet your requirements simply by adding-on the Tishken units you need. And, if you wish, equipment leas-ing can be arranged through Tishken. Ask for details.

Tishken Slitting Systems are a purpose designed and built solution for OEMs and service centers to produce narrow mults, specialty coil to coil product. For ferrous and non-ferrous materials, including surface critical applications, with incoming coils up to 24” wide, with the option of quick change slitter heads and single or multiple recoilers with oscillate winding may be included.

Tishken Edge Conditioning Systems are a service center’s most valued machine. The system economically produces edge conditioned, straightened, and cut-to-length or recoiled product. Whether it is narrow mults, drops, or secondary material, the Tishken Edge Conditioning system can produce saleable products which are more valuable to your customer.
